

I'm from ... Latham, N.Y.

I transferred to Clarkson ...

because I visited and really got a feel of what life was like here. The overall atmosphere just fit and I knew that it would give me the opportunity to get away from home, but not be too far.

Being a student at Clarkson has helped ...

me continue to grow and gain knowledge in fields I am passionate about. It's also given me a challenge, which I am always up for!

I was well prepared for Clarkson ...

because the classes at HVCC were very group oriented, just like at Clarkson. Learning how to be a great team player and having good communication skills were very beneficial.

On campus, I'm involved in ...

Society of Women Engineers, the Clarkson University Transfer Student Association, the Outing Club, and the Ski Club.

What's hot on my plate now ...

is conducting research with the department of chemistry and biomolecular science. Under Professor Evgeny Katz, I'm learning about modifying surfaces such as glass and gold electrons for polymer immobilization.

When I graduate, I want to ...

either find a job working in petroleum or get my master's from Clarkson. I know I can because everyone here is willing to do whatever it takes to help me accomplish my goals.
